- **Voice Announce of incoming callers\***
- **Built-in handsfree intercom**
- **200-name and number Directory**
- **Plug-and-play installation**

**Aastra**  
Telecom

A first in the industry! Venture is the first three-line Caller ID telephone with a built-in digital answering machine.

More like a personal assistant than a phone, Venture actually announces the names of callers listed in your directory whenever they call. Screening calls has never been simpler! And with 14 mailboxes, even part-time business owners can provide full-time access to information about rates, availability, and services.

Digital technology means there are no tapes to wear out or malfunction. Messages can be played, saved, or deleted in any order.

Venture is the first KSU-less system to offer integrated Caller ID and Call Waiting Display\* right on the telephone. Venture offers the same sophisticated capabilities usually found on more expensive key and PBX systems, yet it doesn't require a centralized controller unit.

Best of all, Venture makes it easy to install the system yourself. Just follow the step-by-step display prompts on the screen to set the options and customize the phone to your needs. It can usually be used with your existing wiring and it's ready to perform immediately.

This network-based, service-ready telephone supports Caller ID, Call Waiting Display, and Voice Mail. Venture is perfect for small businesses, home offices, and busy households who need multiple lines. And, Venture can grow right along with your needs—from a three-line telephone to an eight-station system.

Venture. It's expandable, affordable, effortless—and impressive!
